Subject: ECO involvement in Harvey Response -
Date: Wednesday, September 6, 2017 2:27:49 PM

DeAndre –

Just wanted to provide an update regarding ECO's involvement in the Harvey response.

Pam Houston is one of 10 staff who are listed to leave on Friday to assist Region 6.

Pam has been provided guidance for getting, attire and equipment, shots and medical monitoring – her FOH appointment is today at 2:00 p.m.

Debbie Bishop (Superfund) is coordinating travel for Pam and others leaving from the regions.

During today's EJ Coordinators conference call R6 talked about ways EJ is being integrated into the Harvey response. EJ staff in R6 are among the first community liaisons. The R6 EJ community network is being utilized to communicate and coordinate with communities. The EJ network has assisted in identifying facilities that may have issues and need EPA attention. R6 leadership and community liaisons are engaged with EJ stakeholders on an on-going basis. I will let our EJ counterparts in R6 know that Pam (R7 EJ) and LaTonya Sanders (Historical EJ implementation team member) are among those coming to Houston from R7.

Please let me know if you have questions or concerns.

Thanks,

Althea M. Moses
